

**President Obama and Nancy Pelosi are pulling out all the stops to pass a massive pro-abortion health care bill -- the days immediately ahead will decide the issue.**

Changes that have been proposed by President Obama would fix NONE of the abortion problems in the Senate-passed bill (H.R. 3590) which will likely be voted on soon by the House. In fact, they would make them worse.

This is no time to relax! Read about the many problems with the current Senate bill at [www.nrlc.org](http://www.nrlc.org).

**Please immediately TELEPHONE the Washington, D.C. office of your U.S. House member. Any U.S. House office can be reached through the Capitol Switchboard at 202-225-3121. Simply give them your zip code and ask for the phone number of your U.S. Representative. Many are undecided how they will vote, allegedly including Congressman Ron Kind from Wisconsin's 3<sup>rd</sup> Congressional District (according to the Capitol publication "The Hill"). Your Representative needs to hear from you right away, even if you've called before!**

**Ask him or her to vote "no" on the Senate healthcare bill *unless the language of the Stupak Amendment is added*. If they try to say there is no abortion funding in the current bill, tell them that is NOT true and ask them to go to the website of the National Right to Life Committee ([www.nrlc.org](http://www.nrlc.org)) and read the commentary by Legislative Director Douglas Johnson.**
